-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 19 January 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

**Claims 1-3, 5-8, 10** are rejected under 35 U.S.C. 102(b) as being anticipated by Mugura et al. (U.S. Patent No. 6222921 B1), hereinafter referenced as Mugura.

Consider **claim 1**, Mugura discloses a method of selecting a number or address from a list stored in a telecommunications device (abstract, fig. 6) for initiating a call or sending a message from the telecommunications device to the number or address (fig. 6, where Mugura teaches dialing the phone number corresponding to the selected name), the list comprising names and one or more numbers or addresses corresponding to each name (figs. 3, 4 A-E), the method comprising: displaying a list comprising at least some of the stored names, highlighting one of the names displayed in the list and displaying the highlighted name in the list together with a default one of the one or more numbers and/or addresses corresponding to the high-lighted name (Abstract, Col. 1 lines 14-22, 32-58, Col. 3 lines 5-67, Col. 4 lines 1-67, Col. 5 lines 1-67, Col. 6 lines 1-10, Figs. 1-6).

Consider **claim 2**, Mugura discloses everything claimed as implemented above (see claim 1), In addition, Mugura teaches that the method comprising indicating

together with the default number or address whether the list comprises more than one number or address corresponding to the highlighted name (figs. 3, 4, 6).

Consider **claim 3**, Mugura discloses everything claimed as implemented above (see claim 1). In addition, Mugura teaches that selecting the displayed default number or address, if it is indicated that this number or address is the only number or address in the list corresponding to the highlighted name (fig. 6, where Mugura discloses dialing the primary number corresponding to the selected name).

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**Claims 4, 9** are rejected under 35 U.S.C. 103(a) as being unpatentable over Mugura et al. in view of Mak (U.S. patent No. 7358960 B2), hereinafter referenced as Mak.

Consider **claim 4**, Mugura discloses everything claimed as applied above (see claim 2). In addition, Mugura discloses scrolling, if it is indicated that the list comprises more than one number or address corresponding to the highlighted name, and if the displayed default number or address is not the one to which a call should be initiated or a message sent, through the numbers or addresses corresponding to the selected name by means of a navigation device until the number or address to which a call should be initiated or a message sent is displayed; and selecting, when the number or

address to which a call should be initiated or a message sent is displayed, the displayed number (Abstract, Col. 1 lines 14-22, 32-58, Col. 3 lines 5-67, Col. 4 lines 1-67, Col. 5 lines 1-67, Col. 6 lines 1-10, Figs. 1-6). Mugura fails to specifically disclose that scrolling through the numbers or addresses corresponding to the selected name by means of a 4-way navigation device. Mak teaches that scrolling through the numbers or addresses corresponding to the selected name by means of a 4-way navigation device (Col. 5 lines 41-67, Col. 6 lines 1-67, Col. 7 lines 1-33, fig. 3 elements 306a-b, 308a-b, 310).

Therefore, it would have been obvious to one of ordinary skills in the art at the time the invention was made to modify Mugura by specifically providing scrolling through the numbers or addresses corresponding to the selected name by means of a 4-way navigation device, as taught by Mak, for the purpose of facilitating the user with easy navigation through the data on the display as discussed in col. 3 lines 10-14.

Consider **claim 5**, Mugura discloses everything claimed as implemented above (see claim 1), In addition, Mugura teaches that the default one of the one or more numbers or addresses corresponding to the highlighted name is selected based on a mode of the telecommunications device (fig. 6, where Mugura discloses dialing the primary number corresponding to the selected name automatically).

Consider **claim 6**, Mugura teaches a telecommunications device (abstract, fig. 1A), configured to select a number or address from a list (figs. 3, 4 A-E) stored in the telecommunications device for initiating a call or sending a message from the telecommunications device to the number or address (fig. 6, where Mugura teaches dialing the phone number corresponding to the selected name), the list comprising

names and one or more numbers or addresses corresponding to each name (figs. 3, 4 A-E), the telecommunications device being configured to: display a list comprising at least some of the stored names, and highlight one of the names displayed in the list, and display the highlighted name in the list together with a default one of the one or more numbers and/or addresses corresponding to the highlighted name (Abstract, Col. 1 lines 14-22, 32-58, Col. 3 lines 5-67, Col. 4 lines 1-67, Col. 5 lines 1-67, Col. 6 lines 1-10, Figs. 1-6).

**Claim 7**, as analyzed with respect to the limitations as discussed in claim 2.

**Claim 8**, as analyzed with respect to the limitations as discussed in claim 3.

**Claim 9**, as analyzed with respect to the limitations as discussed in claim 4.

**Claim 10**, as analyzed with respect to the limitations as discussed in claim 5.
